Kofax
Power PDF™
Advanced

Kofax® Power PDF Advanced is a PDF solution that helps make it easy for users to gain control over PDF workflows— including PDF conversion, editing, forms, and collaboration processes—in various departments and other uses.

BENEFITS OF POWER PDF ADVANCED

Maximize productivity with an intuitive navigation experience
Power PDF Advanced offers a modern, intuitive user interface. The Quick Access Toolbar permits users to create shortcuts to frequently used features and capabilities.

Support for the industry-standard PDF 2.0 format
The ISO PDF 2.0 standard focuses on the file format that's compatible with programs that utilize and manipulate the file. With Power PDF Advanced, users can create compatible PDF documents with security features.[2]

Sign and send PDFs for signature with e-signature services
Whether approving a purchase, closing a sale, or signing an agreement, users may select to sign a PDF or send it to another party for their signature using the integrated e-signature actions.

Support for Microsoft® Windows 10® touch-enabled devices[3]
Power PDF Advanced allows users to navigate, type, or draw annotations using their tablet, pen, or finger and supports Microsoft Surface® and other compatible touch-enabled devices.[3] It includes a "Touch Mode" option, which can optimize the size of toolbars and tool icons so that they're easier to press and navigate.

Work the way you want
Change the interface to your preferred color. Choose from blue, light gray, dark gray, or purple. Users may also view documents in separate tabs inside one Power PDF window or each document in a separate Power PDF window.

PRODUCT SUMMARY

Accurate document and file conversion
Power PDF Advanced recognizes scanned text and reproduced complex layouts with columns, tables, and graphics. It includes an OCR proofreader tool to help users identify and correct text results so that PDF documents are searchable.

Collaborate in real time
Documents can be created, edited, and combined together in Power PDF in real time with authorized users on the same LAN, without having to send them back and forth among various parties.

Combine open documents with just one click
Users can combine open documents into a single PDF, helping to streamline tasks. Just click the "Combine All" option on the Home toolbar, and bookmarks will be created from the file names to the original documents.

Key Benefits

- Create and assemble PDF files easily from compatible applications[1]
- Accurately convert PDF files into editable Microsoft® Office® documents[1]
- Create PDFs that are compatible with the ISO PDF 2.0 file format
- Powerful document encryption security features[2]
- User-friendly navigation experience
- Turn paper documents into searchable PDFs more productively
- Streamline document reviews and collaboration
- Connect with compatible document management systems and cloud file-sharing sites[1]

BENEFITS OF POWER PDF STANDARD

Create and assemble PDFs from compatible applications[1]
Quickly create industry-standard PDF files that are compatible with all supported PDF viewers.[1]

Archive important emails as PDFs
Save Microsoft® Outlook® and Lotus Notes™ emails as PDF files along with attachments and links.[1]

No need to retype your documents
When working with PDF documents in other applications, Power PDF Standard can help users to limit the need to recreate and reconvert files. Complex layouts with columns, tables, and graphics can be reproduced in Microsoft® Word, Excel®, PowerPoint®, and Corel WordPerfect® documents.[1]

Enhanced document security features[2]
Add passwords with 128-bit and 256-bit AES encryption and permission controls to PDF files to manage document viewing, printing, and modification.

Redact sensitive information[2]
Advanced redaction capabilities allows users to remove confidential data for document sharing.

Help boost productivity with automated workflows
Simplify document scanning, capture, conversion, and redaction workflows. Utilize Power PDF's watched folder capability to convert several Microsoft® Office®[1] documents into PDF files automatically using pre-defined workflow rules.

Connect with document management systems[1]
Send or retrieve PDF files from NetDocuments®, OpenText eDOCS®, iManage®, Livelink®, OpenText Enterprise Connect®, Worldox™, EMC Documentum®, Therefore™, Office 365® and SharePoint®.[1]

SYSTEM REQUIREMENTS[4]

- A computer with an Intel Pentium 4 higher, or equivalent processor
- Supported operating systems
- Windows 10; 32-bit and 64-bit Editions
- Windows 8.1; 32-bit and 64-bit Editions
- Windows 7; 32-bit and 64-bit Editions with Service Pack 1
- Windows Server 2008 R2 with SP1, 2012 R2, 2016 (Citrix, AD, WTS). (Applies to Power PDF Advanced only).
- 512 MB of memory (RAM); 1 GB recommended
- 700 MB of free hard disk space for application files; additional space required for temporary installer files and for additional user interface languages
- Web access needed for product registration, activation, product help, and obtaining live updates for the program
- Microsoft.Net Framework 4.5. If it's not detected, it installs with the product.
