GP-4000/2000

Express Yourself Through Color with the New 10-Color Plus Fluorescent Pink Ink imagePROGRAF GP Series Large-Format Printers.

The GP Series ink has been specially formulated to create bright, bold images. Canon's "Radiant Infusion" technology layers the Fluorescent Pink Ink with other inks on the paper, resulting in bright and soft color reproduction.

With the new Red, Orange, Green, Violet, and Fluorescent Pink Inks, the imagePROGRAF GP-4000/2000 printers have the largest color gamut of any imagePROGRAF printer to date.

Building on imagePROGRAF core technologies, the GP Series has Canon innovations built right in.

COLOR CALIBRATION

Producing accurate color is critical when replicating company logos and brand colors. The built-in Color Calibration function uses a multisensor to read color density and calibrate the printer, so that the last print looks the same as the first.

INTELLIGENT MEDIA HANDLING

Simply set the roll holder in the printer and the media will automatically feed into the device—no need to manually enter media information! The printer will automatically detect the width, length, and type of media.

PANTONE® CALIBRATED

- The world's first PANTONE® Calibrated printers for PANTONE® PASTELS & NEONS GUIDE coated. The GP-4000/2000 printers can hit 97% of the colors in this guide.
- Can hit 99% of the colors in the PANTONE® FORMULA GUIDE solid coated.

SOFTWARE SOLUTIONS

Jam-packed with free available software, the imagePROGRAF GP Series has everything you need to print right out of the box.
